How to Score Pedestrian Report Card Assessments (PRCA)

Non-Signalized Intersections
Scoring Overview

- Signalized intersections are given a score of 1, 2, or 3 per performance measure
  - 3 points – Good Quality
  - 2 points – Fair Quality
  - 1 point – Poor Quality

- If an element related to a performance measure is missing, give a score of 0
  - Sidewalks
  - Curb Ramps
  - Crosswalks
  - Pedestrian Refuge
Key points for

Grading Purposes
Curb Ramps with Detectable Warnings

Detectable Warnings with truncated domes
How to Count Pedestrian Volumes

Visualize an imaginary screen line across a path or roadway. Count pedestrians when they cross this line. Counts are conducted in 15-minute intervals, and comprise the total volume of pedestrians traveling in both directions past a given point.
How to Count Pedestrian Volumes

One pedestrian just crossed the screen line
Sidewalk Presence

• Good (3 points)—Intersections with five-foot wide sidewalks at all approaches

• Fair (2 points)—Intersections with five-foot wide sidewalks on at least half of all approaches

• Poor (1 point)—Intersections with five-foot wide sidewalks at less than half of all approaches or with sidewalks narrower than five feet

• Not present (0 points)—Intersections without sidewalks
Curb Ramp Presence

• Good (3 points)—Intersections where each approach has curb ramps with detectable warnings for each crossing

• Fair (2 points)—Intersections where two or three approaches have curb ramps with detectable warnings for each crossing

• Poor (1 point)—Intersections where there are fewer than two approaches that have curb ramps with detectable warnings for each crossing

• Not present (0 points)—Intersections without curb ramps
Crosswalk Presence

• Good (3 points)—Intersections with crosswalks at all approaches

• Fair (2 points)—Intersections with crosswalks at two or three approaches

• Poor (1 point)—Intersections with crosswalks on fewer than two approaches

• Not present (0 points)—Intersections without crosswalks
Pedestrian Volumes

- **Good (3 points)**—Intersections traversed by at least 60 pedestrians per hour

- **Fair (2 points)**—Intersections traversed by 5 to 60 pedestrians per hour

- **Poor (1 point)**—Intersections traversed by fewer than five pedestrians per hour
Raised Crosswalk Presence

- **Good (3 points)** — Intersections with raised crosswalks at all approaches
- **Fair (2 points)** — Intersections with raised crosswalks at two or three approaches
- **Poor (1 point)** — Intersections with raised crosswalks on fewer than two approaches
- **Not present (0 points)** — Intersections without raised crosswalks
Lanes of Travel

- **Good (3 points)**—Intersections where pedestrians cross one lane of traffic at a time

- **Fair (2 points)**—Intersections where pedestrians cross two travel lanes, each for a different direction of travel

- **Poor (1 point)**—Intersections where pedestrians cross two or more lanes in the same direction of travel
Pedestrian Crashes

Most recent available five-year period

- Good (3 points)—Intersections NOT located in a Highway Safety Improvement Program (HSIP) Pedestrian Crash Cluster
- Fair (2 points)—Intersections with one pedestrian crash
- Poor (1 point)—Intersections with two pedestrian crashes
- Dangerous (0 points)—Intersections located in a HSIP Pedestrian Crash Cluster or with three or more pedestrian crashes

Contact the Boston Region MPO to learn if your intersection has been the site of pedestrian crashes and if it is an HSIP pedestrian crash cluster location.
Crossing Distance

• Good (3 points)—Intersections where the pedestrian crossing distance is less than 20 feet

• Fair (2 points)—Intersections where the pedestrian crossing distance is between 20 and 30 feet

• Poor (1 point)—Intersections where the pedestrian crossing distance is greater than 30 feet
Vehicle Travel Speed

- **Good (3 points)—**Intersections where average vehicle travel speeds are less than 25 miles per hour (mph)
- **Fair (2 points)—**Intersections where average vehicle travel speeds are between 25 mph and 35 mph
- **Poor (1 point)—**Intersections where average vehicle travel speed is 35 mph or more

*Contact the Boston Region MPO to find average vehicle travel speeds at your intersection.*
Sidewalk Condition

- **Good (3 points)** — Intersections with sidewalks in good condition at all approaches

- **Fair (2 points)** — Intersections with sidewalks in good condition at one to three approaches

- **Poor (1 point)** — Intersections without sidewalks in good condition at any approach

- **Not present (0 points)** — Intersections without sidewalks
