How to Score Pedestrian Report Card Assessments (PRCA)

Roadway Segments

Boston Region Metropolitan Planning Organization
Scoring Overview

- Roadway segments are given a score of 1, 2, or 3 per performance measure
  - 3 points – Good Quality
  - 2 points – Fair Quality
  - 1 point – Poor Quality

- If an element related to a performance measure is missing, give a score of 0
  - Sidewalks
  - Crosswalks
  - Pedestrian/Vehicle Buffer
Key points for
Grading Purposes
Curb Ramps with Detectable Warnings

Detectable Warnings with truncated domes
How to Count Pedestrian Volumes

Visualize an imaginary screen line across a path or roadway. Count pedestrians when they cross this line. Counts are conducted in 15-minute intervals, and comprise the total volume of pedestrians traveling in both directions past a given point.
How to Count Pedestrian Volumes

One pedestrian just crossed the screen line
**Sidewalk Presence**

- **Good (3 points)**—Roadway segments with five-foot wide sidewalks on both sides of the street

- **Fair (2 points)**—Roadway segments that have five-foot wide sidewalks on one side of the street

- **Poor (1 point)**—Roadway segments with sidewalks less than five-feet wide or sidewalks lacking continuity

- **Not present (0 points)**—Roadway segments without sidewalks

---

Capacity Management and Mobility
Crosswalk Presence

- **Good (3 points)**—Roadway segments with a minimum of 10 crosswalks per mile
- **Fair (2 points)**—Roadway segments with seven to nine crosswalks per mile
- **Poor (1 point)**—Roadway segments with fewer than seven crosswalks per mile
- **Not present (0 points)**—Roadway segments without crosswalks
Walkway Width

- **Good (3 points)**—Roadway segments with sidewalks along both sides that measure at least five feet wide
- **Fair (2 points)**—Roadway segments with sidewalks on one side that measure at least five feet wide
- **Poor (1 point)**—Roadway segments with less than half of sidewalks measuring at least five feet wide
- **Not present (0 points)**—Roadway segments without sidewalks
Pedestrian Volumes

- **Good (3 points)**—Roadway segments traversed by at least 60 pedestrians per hour
- **Fair (2 points)**—Roadway segments traversed by 5 to 60 pedestrians per hour
- **Poor (1 point)**—Roadway segments traversed by fewer than 5 pedestrians per hour
Adjacent Bicycle Accommodations

*Do not use if peak travel hour bicycle counts are available*

- **Good (3 points)**—Roadway segments with a designated bicycle travel lane
- **Fair (2 points)**—Roadway segments with sharrows or extra wide shoulders
- **Poor (1 point)**—Roadway segments without space for bicycle travel
Bicycle Volumes

*Use if peak travel hour bicycle counts are available*

- **Good (3 points)**—Roadway segments with more than 60 bicyclists per hour
- **Fair (2 points)**—Roadway segments with between 5 and 60 bicyclists per hour
- **Poor (1 point)**—Roadway segments with fewer than five bicyclists per hour
Pedestrian Crashes

Most recent available five-year period

- Good (3 points)—Roadway segments NOT located in a Highway Safety Improvement Program (HSIP) Pedestrian Crash Cluster
- Fair (2 points)—Roadway segments with one pedestrian crash
- Poor (1 point)—Roadway segments with two pedestrian crashes
- Dangerous (0 points)—Roadway segments located in a HSIP Pedestrian Crash Cluster or with three or more pedestrian crashes

Contact the Boston Region MPO to learn if your intersection has been the site of pedestrian crashes and if it is an HSIP pedestrian crash cluster location.
Pedestrian/Vehicle Buffer

*Total distance between vehicular traffic and pedestrian traffic*

- **Good (3 points)**—Roadway segments with at least a 10-foot buffer
- **Fair (2 points)**—Roadway segments with a 5- to 10-foot buffer
- **Poor (1 point)**—Roadway segments with buffers narrower than five feet wide
- **Not present (0 points)**—Roadway segments without buffers
Vehicle Travel Speed

- Good (3 points)—Roadway segments where average vehicle travel speeds are less than 25 miles per hour (mph)
- Fair (2 points)—Roadway segments where average vehicle travel speeds are between 25 mph and 35 mph
- Poor (1 point)—Roadway segments where average vehicle travel speed is 35 mph or more

Contact the Boston Region MPO to find average vehicle travel speeds at your intersection.
Sidewalk Condition

• Good (3 points)—Roadway segments with sidewalks in good condition on both sides of the street

• Fair (2 points)—Roadway segments with sidewalks in good condition on one side of the street

• Poor (1 point)—Roadway segments with less than half of sidewalks in good condition

• Not present (0 point)—Roadway segments without sidewalks
Transportation Equity Factor
